**Notes:**

This calendar is for weekly comparison purposes. It lines up the current-year week numbers to same last-year week numbers. It does not reflect the dates included in monthly reports, with the exception of pricing reports.

This calendar is not meant to indicate collection dates. Date collection is weekly and collection dates are every Saturday, the last day of the week.

The decision on the monthly split is as follows: if the week ends on the 4<sup>th</sup> or later, the week is associated to the new month. If not, it is associated to the previous month. The decision split for monthly reporting differs.

Monthly reporting is based on a calendar month applying percentage splits (except December which only splits a week if the final week is 3 days or greater) - see back for split rules.

Hatchery reports are the exception to the above. Hatchery reports are also on a calendar month with splits for all months except December. December is a true collection split. Therefore, all hatcheries are asked to provide two final week reports: one that ends Dec 31<sup>st</sup> and one, for the remainder of the last week of the year (unless December 31<sup>st</sup> is a Saturday).

The following poultry datasets use this calendar: slaughter, processed eggs production, prices, egg imports and exports, and hatchery (see note above).
